- Upgrade to Pro

How to Use This Bundle (Quickstart)

Read this once. Execute daily.

1. Pick one core offer you want to sell for the next 30 days.

2. Run Prompt #1 (Offer Lock). Paste the output at the top of your workspace.
3. Run Prompt #2 (ICP Sniper). Choose one ICP. Commit.
4. Use the 30-Day Shred tasks. One per day. No swaps.
5. Track points using the Gamification Template. Do not rely on motivation.
6. Each week, run Prompt #12 (Weekly CEO Review). Adjust the system, not your willpower.

🎯 **Rule:** One offer. One ICP. One channel for 30 days.
If you change variables mid-run, you reset the experiment.

Anchor Prompts (12)

PromptForge style. Copy/paste. Replace variables. Run. Execute.

⚙️ **Variable legend**

- {Company}
- {Offer}
- {ICP}
- {Industry}
- {Price}
- {Timeframe}
- {Channel}
- {Proof}/{CaseStudies}
- {Constraints}/{Rules}
- {Tone} (default: “direct, founder-led”)

1) Offer Lock

Use when: your offer feels broad, messy, or hard to explain.

Prompt

You are EthinX. You speak with founder-level clarity.

Context:

- Company: {Company}
- Current offer (raw): {Offer}
- ICP: {ICP}
- Price: {Price}
- Timeframe to deliver outcome: {Timeframe}
- Constraints: {Constraints}

Task:

1) Rewrite the offer into one sentence that a buyer instantly understands.

2) Define the deliverable in 5 bullets (tangible, checkable).

3) Define the outcome in 3 bullets (measurable where possible).

4) Write 3 “who this is NOT for” bullets.

5) Give me a one-line guarantee* (ethical, not hype).

Rules:

- No fluff. No buzzwords.
- Use short sentences.
- If you make an assumption, label it “Assumption: …”.

Output format:

- Offer sentence
- Deliverables (5)
- Outcomes (3)
- Not for (3)
- Guarantee line

Example output

- Offer sentence: We help B2B service founders turn expert work into a repeatable sales system in 30 days.

- Deliverables: Offer page copy; outreach script pack; lead list criteria; simple CRM pipeline; weekly scorecard.
- Outcomes: More qualified conversations; faster “yes/:no”; predictable weekly lead volume.
- Not for: Anyone without delivery capacity; anyone unwilling to talk to customers; anyone chasing “viral” shortcuts.
- Guarantee line: If you execute the plan and see zero lift in qualified conversations, we extend support for 2 extra weeks.

---

2) ICP Sniper

Use when: you’re selling to “everyone” and closing no one.

Prompt

You are EthinX.

Inputs:

- Offer: {Offer}
- Industry options I’m considering: {Industry}
- My unfair advantages: {Proof}
- Preferred channel: {Channel}

Task:

1) Propose 3 tight ICPs.

2) For each ICP, write:

  - Job title/+company type
  - Trigger event (what makes them buy now)
  - Top 3 pains (specific)
  - What they’ve already tried
  - What they fear
  - Exact words they use (5 quotes)

3) Recommend 1 ICP to commit to for 30 days and justify it.

Rules:

- If you can't justify, say "Not enough data" and make minimal assumptions.

Example output

Recommended ICP: Boutique agency owners (5–20 staff) who sell project work and want retainer stability.

Trigger: A key client churns or pipeline dips for 2 consecutive months.

Pains: Unpredictable revenue; inconsistent lead flow; messy proposals.

Quotes: "We're busy but not stable." "Our referrals dried up." "I hate selling." ...

---

3) Pain-to-Promise Mapper

Use when: your messaging describes features, not outcomes.

Prompt

You are EthinX.

Inputs:

- ICP: {ICP}
- Offer: {Offer}
- Proof/: {Proof}

Task:

1) List 10 concrete pains for this ICP (no generic phrasing).

2) For each pain, map:

  - Root cause (why it persists)
  - The "dream outcome" (what they really want)
  - A credible promise we can make (no hype)
  - 1 proof artifact we should create (case study, teardown, benchmark, demo)

3) Choose the top 3 pains to anchor our message for the next 30 days.

Output format:

- Pain → Root cause → Dream outcome → Credible promise → Proof artifact
- Top 3 message anchors

Example output

Pain: “Our inbound leads are random.” → Root cause: no consistent distribution system → Dream: weekly qualified calls → Promise: predictable outbound+content cadence → Proof: 14-day lead log screenshot.

---

4) Objection Crusher

Use when: prospects stall, delay, or ghost.

Prompt

You are EthinX.

Inputs:

- Offer: {Offer}
- ICP: {ICP}
- Price: {Price}

Task:

Generate a battlecard for the top 12 objections.

For each objection, write:

1) What they’re actually afraid of

2) A direct one-liner response

3) A 3-sentence deeper explanation

4) A proof asset to send

5) A question that moves the deal forward

Rules:

- No manipulation.
- No “pressure”.

Example output

Objection: “It’s too expensive.”

Actually afraid of: paying and getting no result.

One-liner: You’re not buying effort. You’re buying a measurable outcome with a clear plan.

Forward question: What would “worth it” look like in numbers for you?

---

5) Message-to-CTA Builder

Use when: your content gets likes but no leads.

Prompt

You are EthinX.

Inputs:

- ICP: {ICP}
- Offer: {Offer}
- Channel: {Channel}
- Constraints: {Constraints}

Task:

Create 10 content angles and pair each with a matching CTA.

For each:

- Hook (1 line)
- Core point (3 bullets)
- CTA (1 line)
- CTA landing target (DM, form, calendar, email)

Rules:

- CTA must feel like the next obvious step.
- No “book a call” spam.

Example output

Hook: “Your ‘pipeline problem’ is a positioning problem.”

CTA: “DM ‘PIPELINE’ and I’ll send the 5-question diagnostic.”

---

6) Content Engine (30 Ideas)

Use when: you run out of things to publish.

Prompt

You are EthinX.

Inputs:

- ICP: {ICP}

- Offer: {Offer}
- Channel: {Channel}

Task:

Generate 30 content ideas for the next 30 days.

Each idea must include:

- Topic
- Format (post, thread, short video, carousel, email)
- One-sentence thesis
- Proof required (screenshot, story, numbers, demo, teardown)
- CTA

Rules:

- No generic tips.
- Make each idea “opinionated+provable.”

Example output

Topic: “Why discovery calls fail.” Format: post. Thesis: You’re asking questions without a hypothesis. Proof: call notes screenshot. CTA: “Comment ‘DISCOVERY’ for my script.”

---

7) Sales Call Drilldown

Use when: calls feel friendly but don’t close.

Prompt

You are EthinX.

Inputs:

- Offer: {Offer}
- ICP: {ICP}
- Price: {Price}

Task:

1) Create a 7-part call structure with exact questions.

2) For each part, include:

- Objective
- 3 questions
- What a “good answer” sounds like
- What a “bad fit” sounds like

3) Create a closing script that feels direct and calm.

Rules:

- Do not oversell.
- If the prospect is not a fit, we disqualify fast.

Example output

Close: “Based on what you said, the fastest path is X. Do you want me to map the plan and lead it, or do you want to keep it internal?”

---

8) Proposal Writer

Use when: you need proposals that move deals forward.

Prompt

You are EthinX.

Inputs:

- Prospect notes: {Notes}
- Offer: {Offer}
- Price: {Price}
- Timeframe: {Timeframe}

Task:

Write a one-page proposal with:

- Problem (their words)
- Outcome (measurable)
- Scope (deliverables)
- Timeline (week-by-week)
- Responsibilities (client vs us)
- Investment+payment terms

- Risks+how we mitigate
- Next step

Rules:

- Keep it under 400 words.
- Use bullets. Short lines.

Example output

Next step: Reply “YES” and I’ll send the agreement and kickoff checklist within 24 hours.

---

9) Pricing & Packaging Optimizer

Use when: pricing feels random or hard to defend.

Prompt

You are EthinX.

Inputs:

- Offer: {Offer}
- Current price: {Price}
- ICP: {ICP}
- Delivery constraints: {Constraints}

Task:

1) Propose 3 packages (Good/:Better/:Best) with clear boundaries.

2) For each package, include:

  - Who it’s for
  - Deliverables
  - Time to value
  - Price rationale

3) Provide 5 lines to defend the price without being defensive.

Rules:

- Packages must reduce delivery chaos.

Example output

Price defense line: “This is priced against the cost of staying stuck, not against a freelancer’s hourly rate.”

---

10) Retention & Expansion Plan

Use when: you want longer client lifetimes and upsells that feel earned.

Prompt

You are EthinX.

Inputs:

- Current delivery: {Delivery}
- ICP: {ICP}

Task:

Create a 90-day client success plan:

- Day 0 kickoff
- Week 1 wins
- Weekly cadence
- Monthly review
- Renewal conversation script
- Expansion menu (3 add-ons) with triggers to offer them

Rules:

- Tie everything to measurable outcomes.

Example output

Renewal line: “We’ve achieved X. Next quarter, the constraint is Y. Want us to own that too?”

---

11) Referral Flywheel

Use when: you want predictable referrals without begging.

Prompt

You are EthinX.

Inputs:

- ICP: {ICP}
- Offer: {Offer}
- Proof: {Proof}

Task:

Build a referral system with:

- The “referral moment” (when to ask)
- The ask script (DM+email)
- A referral incentive that isn’t cringe
- A simple tracking method
- 10 partner targets (types of businesses) and why they fit

Rules:

- Keep it simple. Low admin.

Example output

Ask script: “If you know one person with X problem, send them this line: ‘Talk to {Company}. They fixed this for us.’”

---

12) Weekly CEO Review

Use when: you need control of the system.

Prompt

You are EthinX.

Inputs:

- This week metrics:
  - Leads generated: {Leads}
  - Qualified conversations: {Convos}
  - Proposals sent: {Proposals}
  - Closed deals: {Deals}
  - Revenue: {Revenue}
- What shipped this week: {Shipped}
- What blocked us: {Blocks}

Task:

1) Diagnose the bottleneck (one sentence).

2) Give me 3 decisions to make this week.

3) Give me 5 actions for next week.

4) Write a “stop doing” list (3 items).

Rules:

- If metrics are missing, call it out.

Example output

Bottleneck: Too few qualified conversations because outbound list quality is weak.

Decisions: Narrow ICP; change trigger; publish 3 proof posts.

Stop doing: Random content; rewriting the offer; taking non-fit calls.

Revenue Predictor

This is a simple predictor. It forces honesty.

The formula

Monthly Revenue = Leads × Qualification Rate × Close Rate × Average Deal Value

Where:

- Leads = new leads per month (inbound+outbound)
- Qualification Rate = % of leads that become real sales conversations
- Close Rate = % of conversations that become paying customers
- Average Deal Value = your average revenue per closed deal (one-time or first-month, choose one and stay consistent)

🧮 **Why this works:** If revenue is low, one of these variables is low. Fix the constraint. Don’t guess.

Duplicate-friendly table

Copy this table into a new page or duplicate inside Notion.

Input	Your number	Notes
Leads per month	{Leads}	Count new leads you can contact.
Qualification rate	{QualRate}	Example: 0.30
Close rate	{CloseRate}	Example: 0.20
Average deal value	{DealValue}	Choose a consistent definition.
Predicted monthly revenue	= Leads × QualRate × CloseRate × DealValue	Run scenarios by changing one variable.

What this means (interpretation)

- If Leads is low: you have a distribution problem.
- If Qualification is low: your targeting+message is off.
- If Close Rate is low: your offer, proof, or sales process is weak.
- If Deal Value is low: packaging+positioning is undersold.

📌 **Rule:** Improve one variable per week.
If you try to fix all four at once, you learn nothing.

30-Day Shred Checklist (Daily Actions)

Execution only. One task per day. Do it. Log it.

☐ Day 1: Run Prompt #1 (Offer Lock). Save the one-sentence offer and deliverables at the top of your workspace.

☐ Day 2: Run Prompt #2 (ICP Sniper). Pick 1 ICP. Write it in one sentence. Lock it.

☐ Day 3: Write 10 trigger events that indicate your ICP is ready to buy (e.g., “hired first salesperson,” “lost a big client”).

☐ Day 4: Build a lead list of 50 targets that match your ICP and triggers. Record name+URL+reason they fit.

☐ Day 5: Run Prompt #3 (Pain-to-Promise). Extract the top 3 pains and turn them into 3 message anchors.

☐ Day 6: Write 1 proof asset outline (case study or teardown). Include: before, after, mechanism, numbers.

☐ Day 7: Publish 1 post/(email) teaching one mechanism behind your result. End with a simple CTA.

☐ Day 8: Write a 150-word DM+email outreach script for your ICP. One hook. One offer. One CTA.

☐ Day 9: Send 20 targeted outreach messages. Personalize the first line using their trigger evidence.

☐ Day 10: Create a one-page “How we work” doc: steps, timeline, what you need from the client.

☐ Day 11: Run Prompt #4 (Objection Crusher). Pick the top 3 objections you hear and prepare responses.

☐ Day 12: Publish 1 proof post: screenshot, numbers, or a teardown with a clear lesson.

☐ Day 13: Follow up with every outreach lead from Day 9 using a one-line bump + one proof asset.

☐ Day 14: Build a simple pipeline: Lead → Conversation → Proposal → Closed → Won’t close. Add your current leads.

☐ Day 15: Run Prompt #7 (Sales Call Drilldown). Print the questions. Use them on your next call.

☐ Day 16: Do 5 customer+prospect interviews (15 minutes each). Ask: “What made you start looking?” and “What would make this a win?”

☐ Day 17: Update your message anchors using the exact customer words you heard (5 quotes).

☐ Day 18: Create a “starter offer” CTA (low friction): diagnostic, teardown, or short workshop. Define scope and price.

☐ Day 19: Publish 1 post that disqualifies non-fit buyers (who it’s not for). This increases trust.

☐ Day 20: Send 20 more outreach messages. Use your updated hooks and proof.

☐ Day 21: Create a proposal template using Prompt #8. Keep it one page. Use it for every proposal.

☐ Day 22: Identify your biggest delivery bottleneck. Remove it (template, checklist, automation, delegation).

☐ Day 23: Run Prompt #9 (Pricing & Packaging). Define boundaries. Update your packages.

☐ Day 24: Publish 1 offer post: problem → mechanism → deliverables → price range → CTA.

☐ Day 25: Follow up on all open conversations with a “decision ask”: “Is this a no or are we moving forward?”

☐ Day 26: Create a simple onboarding checklist for new clients (access, inputs, timeline, comms cadence).

☐ Day 27: Run Prompt #10 (Retention & Expansion). Create your 90-day plan for delivery.

☐ Day 28: Build a referral ask script using Prompt #11. Send it to 5 warm contacts+past clients.

☐ Day 29: Create a weekly scorecard with 5 metrics (leads, convos, proposals, closes, revenue). Fill it in.

☐ Day 30: Run Prompt #12 (Weekly CEO Review). Write the bottleneck and next week’s plan in 5 actions.

Gamification Template (T-Dog Points)

This turns execution into a game you can win.

Levels

- Bronze: 0–99 points
- Silver: 100–249 points
- Gold: 250–499 points
- Platinum: 500–999 points
- Legendary: 1000+ points

Point rules (simple and strict)

Earn points only for shipped actions.

- 5 pts: Publish one piece of content (post, email, short video)

- 5 pts: Send 10 targeted outreach messages
- 10 pts: Run one Anchor Prompt and save the output in your workspace
- 15 pts: Have one qualified sales conversation (meets ICP+trigger)
- 25 pts: Send one proposal
- 50 pts: Close one deal
- 10 pts: Create one proof asset (case study, teardown, benchmark)
- 10 pts: Do 3 customer+prospect interviews

Penalties (keeps the game honest):

- -10 pts: Change ICP mid-30 days
- -10 pts: Change offer mid-30 days
- -5 pts: Skip two days in a row (restart streak)

🧠 **Tracking rule:** If it's not logged, it didn't happen.

How to track progress (copy/paste template)

Use this as a simple daily log.

Date	Shipped actions	Points earned	Total points	Notes (what worked)
{YYYY-MM-DD}	{Action 1; Action 2}	{+X}	{Running total}	{One-line insight}

How to reward milestones

Keep rewards small. Keep them immediate.

- Silver (100): Buy time back (outsourcing, tool upgrade, 2 hours off).
- Gold (250): Upgrade your environment (desk, workflow tool, template pack).
- Platinum (500): Strategic reward (weekend off, mini-trip, coaching session).
- Legendary (1000): Ship a bigger move (hire, new offer, partnership, rebrand).

+100 T-Dog Activation

This is your first real unlock.

What it unlocks

- You become a finisher.
- You have proof that your system works.
- You've earned the right to scale the inputs.

How points accumulate

- You earn points from shipped actions only.
- The fastest path is outbound+content+calls.
- 100 points is not "hard." It's consistent.

Example path to 100:

- Publish 6 times (6×5 = 30)
- Send 120 outreach messages (12×5 = 60)
- Run 1 Anchor Prompt and save outputs (1×10 = 10)

Total: 100

How to track it

- Use the daily log table above.
- Add one visible number at the top of your workspace: "T-Dog Points: ___".
- Update it daily. No exceptions.

🔒 **Activation condition:** Hit 100 points without changing your offer or ICP.

Upgrade to Pro (Soft Upsell)

If you want deeper support and faster iteration, Pro is the next step.

What Pro adds:

- More advanced prompt packs (ads, webinar funnels, partnerships, hiring)
- Done-with-you reviews (messaging, offer, pipeline)
- Proof asset frameworks and teardown templates
- Advanced tracking systems (scorecards, dashboards, attribution)
